INTERLOCUTOR´S TASK SHEET   **TOPIC: IT Careers**

PART TWO	Information Technology Technical Question	3 mins

In this part of the exam, you will talk about **IT Careers**. The following ideas will help you.

- Talk about the IT jobs below. What skills do you need to do them?

IT Specialist	**Data Analyst**
Web Developer	**Product Manager**
Network Systems Administrator	**App and Game Developer**
Cybersecurity Specialist	**Cloud Computing Specialist**

- Which job would you like to do? Why?

IT Specialist: Installs and maintains computer hardware, software, and networks. Key skills include customer service, communication, and troubleshooting.

Web Developer: Creates and maintains websites and apps. You'll need skills in HTML, JavaScript, and design concepts.

Network Systems Administrator: Manages the security and stability of networks and systems. Important skills include knowledge of computer systems, software, and cloud computing.

Cybersecurity Specialist: Protects computer systems and sensitive information from malware and unauthorized access. This role requires strong analytical and problem-solving skills.

Data Analyst: Interprets data to help organizations make informed decisions. Skills in statistics, data visualization, and programming languages like Python or R are essential.
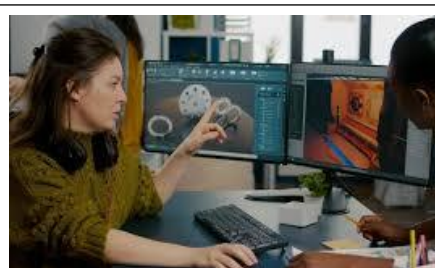

Cloud Computing Specialist: Manages cloud-based systems and services. You'll need a good understanding of cloud platforms like AWS, Azure, or Google Cloud.

App and Game Developer: Designs and develops mobile apps and games. Coding skills and creativity are key for this role.

Product Manager: Leads development teams from concept to completion, managing roadmaps and collaborating with cross-functional teams.
