

```
1 If statements:
2
3     If value1 = value2 Then
4         MsgBox value1
5     End if
6
7     Select case value1
8         Case 1
9             MsgBox 1
10        Case 2
11            MsgBox 2
12    End Select
13
14
15 Cycles:
16
17     For i = 0 To 10
18         MsgBox i
19     Next i
20
21     While i < 10
22         MsgBox i
23         i = i + 1
24     Wend
25
26
27
28 Function declaration:
29
30     Variables in a module:
31
32         Public i as Integer
33
34
35
36     Function Calculation(value As Integer)
37         Calculation = value
38     End Function
39
40
41
42 Variable declaration:
43
44     Dim i as Integer
45     Dim array(0 To 9) As Integer
46
47
48
49 New Line:
50
51     Chr(13) & Chr(10)
52
53
54
55 Useful functions:
56
57     Random number:
58
59         Rnd(value)
60         (topBoundary - bottomBoundary) * Rnd() + bottomBoundary --> random number from n to m
61
62     Other:
63         label.Caption --> get text from label
64         object.Value --> get value from i.e. textbox
65         .Visible
66         .SetFocus
67         InputBox()
68         CStr(value)
69         CInt(String)
70         Format()
71         FormatNumber()
72         Sqr()
73
74
```

```
75 Database operations:
76
77     DoCmd.OpenForm
78     DoCmd.Close --> closes a form
79     DoCmd.OpenQuery
80     DoCmd.OpenTable
81     DoCmd.Quit --> closes the database
82
83     DoCmd.RunSQL()
```
